Disclaimer:
These drawings have been created to document the chassis of the 1965 Daytona Coupe Cobras. A total of six of these cars were constructed between 1964 and 1965. Although the similarities between the six are obvious, there are also numerous and sometimes subtle differences between the cars. These drawings represent a composite of several original cars and are not intended to duplicate any one particular design. These drawings have been prepared with the best information available, however they are provided with no written or implied guarantee of accuracy or suitability of purpose and they are intended to be used solely for entertainment purposes.
